IMPORTANT INFORMATION AND CLIENT CONSENT: Please read and sign at the end stating you have fully read and understand the information below.

Professionals Include:
Dr. B. Lynn M. Williams

CLIENT/THERAPIST RELATIONSHIP: You and I have a professional relationship existing exclusively for therapeutic treatment. This relationship functions most effectively when it remains strictly professional and involves only the therapeutic aspect. Your Therapist can best serve your needs by focusing solely on therapy and avoiding any type of social or business relationship. Gifts are not appropriate, nor is any sort of trade of service for service.

AVAILABLE SERVICES: I offer a wide array of counseling services and medication management to children, adolescents, adults, and the elderly. Effective psychotherapy and/or medication management is founded on mutual understanding and good rapport between client and therapist/prescriber. It is my intent to convey the policies and procedures used in my practice, and I will be pleased to discuss any questions or concerns you may have.

RISKS AND BENEFITS: Psychotherapy and medication management are often beneficial. In addition, I will prescribe medications that are FDA approved for the your diagnosis. I will go over any side effects with you, but I also impress upon patients the need to read any handouts that the pharmacy provides for you. If you are also seeing me for therapy please note that during counseling, you will have discussions about personal issues which may bring to the surface uncomfortable emotions such as anger, guilt, and sadness. The benefits of counseling can far outweigh any discomfort encountered during the process, however. Some of the possible benefits are improved personal relationships, reduced feelings of emotional distress, and specific problem solving. I cannot guarantee these benefits, of course. It is my desire, however, to work with you to attain your personal goals for psychotherapy and/or for medication management.

COUNSELING: I provide short-term counseling designed to address many of the issues my clients are dealing with. I also provide medication management in the event that you are already working with a counselor or therapist. However, your first visit will be an initial assessment and evaluation for treatment session lasting 60 minutes in which you and I will determine your concerns, and if both agree that I can meet your therapeutic needs, develop a plan of treatment.

The goal of our therapeutic relationship is to provide the most effective therapeutic experience available to you. If at any time you feel that you and I are not a good fit, please discuss this matter with me to determine if transferring to a more suitable Therapist/prescriber is right for you. I will address your concerns with respect and care. If you and I decide that other services would be more appropriate, I will assist you in finding a provider to meet your needs.

Wellness is more than the absence of disease; it is a state of optimal well-being. It goes beyond the curing of illness to achieving health. Through the ongoing integration of our physical, emotional, mental, and spiritual self, each person has the opportunity to create and preserve a whole and happy life. My services are designed to provide my clients an integrated solution for their mind, body, spirit, and life to enhance their lives and resolve issues.
